Sigma Solutions Demonstrates 21st Century Classroom Solutions at TCEA 2012

*SigmaEDU's Reference Architecture Platform Offers New
Paradigm in IT Infrastructure and Services*

Austin, TX - February 9, 2012 – Today at TCEA 2012, Sigma Solutions demonstrated its 21st Century Classroom Solution, SigmaEDU™ - a new generation reference architecture and suite of advisory and implementation services for school districts of all sizes.

Consult. Implement. Operate.

With SigmaEDU, school districts will now have more options than ever before to mix and match the solution and implementation plan best suits their needs. Be it virtualization, storage optimization, VoIP, wireless or security, Sigma's Consulting Advisors, with specific education expertise has relationships in place with leading manufacturers from around the world.

Through its three-step methodology, Sigma Advisors offer services to help a district evaluate their needs, align with budget requirements, current and future infrastructure road maps, selection of best-fit vendors, deployment and integration.

Virtualization and Datacenter Insights and Expertise

Sigma Solutions brings over a decade of real world virtualization and datacenter expertise that will help a school district on the right path for building out and maintaining its IT infrastructure. Optionally, school districts can team with Sigma to have on-site experts or remote services depending on the needs and scale of the project.

“School districts are very much a multi-location, highly distributed organization with very unique needs,” commented Dave Miller, Sigma’s Chief Executive Officer. “We are here to help school districts evaluate and deploy the best datacenter and desktop virtualization solution that is best for them.”

Collaborate. Educate. Go!

“Schools across the country are moving towards BYOD – (Bring Your Own Device) programs, taking the traditional classroom into an interactive mix of devices delivering a personal learning experience to all students,” stated Kyle Berger, Executive Director of Technology, Cedar Hill ISD. “The keys to success for the schools in this endeavor is being able to bring every device, the tools and resources schools already have invested in making a seamless delivery platform for students to access any device, anywhere, and anytime. True learning with no boundaries is what SigmaEDU will bring to schools across the country.”

Thought Leadership at TCEA 2012

Sigma Solutions will be exhibiting at TCEA 2012, and providing real time demonstrations of its prototype classroom of the future, featuring its SigmaEDU reference design platform.

About Sigma Solutions

Sigma is leading the new IT conversation, enabling customers to rethink IT and take advantage of technologies that are powering the next-generation datacenter on the journey to the cloud. Sigma’s technologists and sales team take a vendor-independent approach and advises our customers on current trends like consumerization, collaboration, cloud, and recommends solutions like mobile device management, desktop virtualization to name a few, that are proven to meet these challenges.
